VONDER is first and foremost an expert manufacturer of furniture and produces its collections in the Netherlands. Vonder combines traditional craftsmanship with an extensive knowledge of techniques and finishes. This results in bespoke interiors that exude tranquillity and a timeless beauty, forming a natural fit with their occupants, architecture and surroundings.

ARCHITECT Kate Hume is a renowned interior designer with an international client base. Her interiors epitomise restrained luxury, with her choice of colours and eclectic style combining to create a warm and welcoming home.

THE CROSBY COLLECTION encapsulates the joy of coming home to a place of unassuming luxury where the memories are your own. It sums up Kate Hume's view of modern living which echoes to the past yet will endure through future generations.

The collection comprises a kitchen with pantry, wardrobes, library, panelling and doors, all of which are characterised by the simplicity and elegance of their design, detailing and carefully selected materials. The finest types of wood, marble worktops and leather and bronze-finished coverings are all handled and shaped with skilful precision.

STANDARD SIZES AND BESPOKE The entire Crosby Collection is made to measure and installed in the interior, including all fixtures and fittings. The knowledge and experience gained over the years has enabled a standard collection to be derived from this, within which there is a choice of dimensions and arrangements. Vonder's expertise in the development of special wood joints, finishes and unique detailing gives designers the freedom to incorporate new details in each specific project.
